

HVAC gateways

Multiple indoor unit control

NEW 700 Series Air

Intesis common platform for HVAC integration

700 Series Air is the new platform concept for Intesis AC Interfaces.

This concept enables interfaces for multiple HVAC Brands and Building Automation protocols in the same hardware so, the user can pair the combination using Intesis MAPS. The process is called late configuration.

Benefits

- Match your hardware with your HVAC system application with just a few clicks.
- Exchangeable AC brands and system Protocols combinations.
- Common configuration tool for all of them: Intesis MAPS.
- Hardware series for the major AC manufacturers and standard protocols in the market.
- Enable energy efficiency functions by calculating the individual consumption of each indoor unit.

Product features

Stock-Friendly

All the possible combinations in one product.

3 Binary Inputs

For Energy Saving purposes.

User-friendly configuration

Easy to set up with Intesis MAPS, our user-friendly configuration tool.

High capacity

Up to 128 indoor units depending on the model.

Certification

International and local certifications.
Ready to be sold worldwide

Match the brand with the communication protocol

Having different HVAC brands and Building Automation protocols available on the same hardware, enable multiple integration possibilities. Each HVAC to protocol combination is defined as an application.

Intesis MAPS is the configuration tool that will allow you to select the correct application and match your project's needs. Is an easy process you don't need to plan in advance.

700series for AC Interfaces Air

IN770AIR***0000

Intesis multi-brand AC Interface with KNX, Serial and IP support - XXS, S, M Licenses

IN771AIR00L0000

Intesis multi-brand AC Interface with KNX, Serial and IP support - L License

IN776MHI***0000

Mitsubishi Heavy Industries VRF with KNX, Serial and IP support - XXS, S, M, L Licenses

IN775FGL***0000

Fujitsu AC interface with KNX, Serial and IP support - XXS, S, M Licenses
