Intesis AC gateways
for Mitsubishi Heavy Industries

Intesis® BY HMS NETWORKS

MITSUBISHI HEAVY INDUSTRIES, LTD.

Developed in collaboration with Mitsubishi Heavy Industries, Intesis gateways are fully compatible with FD and VRF systems as they can connect directly to the indoor units or the Superlink network.
The gateways for multi-indoor unit systems are compatible with the PAC and RAC series through the SC-ADNA-E adapter.

The Intesis Power Estimation Algorithm estimates the energy consumption of each indoor unit, enabling your project to meet the energy efficiency specifications.
