Intesis AC gateways for Panasonic

Intesis BY HMS NETWORKS

Panasonic

Developed in collaboration with Panasonic Europe, Intesis gateways are fully compatible with residential and VRF systems as they can connect directly to the indoor units or the P-Link/S-Link network.

Intesis IN485PAN001I000 gateway is compatible with Panasonic's nanoeX and nanoeG technology. The Intesis Power Estimation Algorithm estimates the energy consumption of each indoor unit, enabling your project to meet the energy efficiency specifications.
