

Intesis AC gateways for Samsung

Intesis®
BY HMS NETWORKS

SAMSUNG

Developed in collaboration with Samsung, Intesis gateways are fully compatible with Samsung systems as they can connect directly to the indoor unit or the R1/R2 network.

The gateways for multi-indoor unit systems are compatible with Samsung's WindFree technology when they're set for Modbus, KNX, and BACnet; in the case of the gateways for individual control, this technology is supported for BACnet only. The Intesis Power Estimation Algorithm estimates the energy consumption of each indoor unit, enabling your project to meet the energy efficiency specifications.
