

Industrial Network Services

Optimize Reliability. Prevent Downtime. Strengthen Performance.

On-site and remote services for diagnostics, troubleshooting, network design, and lasting reliability.

Industrial Networks That Never Fail

Network Reliability Matters

In industrial automation, network failure is simply not an option. Even minor communication issues can lead to costly downtime and significant operational disruption.

Prevent Downtime Before It Happens

Unexpected outages caused by faults or poor network design can affect productivity, safety, and efficiency. Proactive assessment and expert support are essential to keeping systems stable.

Services That Strengthen Your Network

Our Industrial Network Services help ensure your industrial networks, whether Fieldbus or Industrial Ethernet, remain robust, efficient, and ready for continuous operation.

Expert Guidance You Can Trust

Rely on our global team of skilled and experienced engineers to safeguard your network health, provide clear insight, and deliver trusted advice tailored to your needs.

Optimized Network Performance at Every Stage

Reliability

Minimize unplanned downtime with networks built for consistent, stable performance.

Capability

Equip your team with actionable insights and repeatable processes for long-term network management.

Efficiency

Diagnose and resolve problems quickly, keeping production on schedule and under budget.

Quality

Leverage HMS-certified expertise and proven methods to ensure lasting network excellence.

4 Proven Services for Network Reliability

On-site Network Audit

Prevent Failures Before They Occur

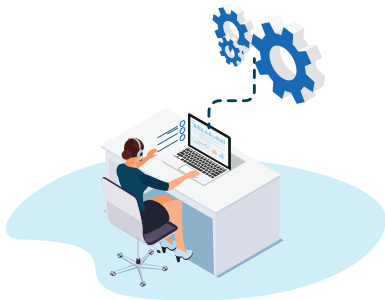

Our experts conduct a full health assessment of your industrial network, identifying risks, weaknesses, and optimization opportunities.

On-site Network Troubleshooting

Rapid Expert Support When Problems Occur

Our experts diagnose and resolve industrial network communication issues on-site, minimizing downtime and restoring stable operations.

Remote Network Consultancy

Expert Insights, Wherever You Are

Our experts remotely verify industrial network data and reports, providing fast and efficient support across global locations.

Network Design and Advisory Services

Performance That Lasts

Our experts advise on scalable and future-proof industrial network architectures, secure by design and compliant with international guidelines and regulations.

Tailored Industrial Network Services

Our service contracts provide ongoing support to maintain network performance and reliability.

Customized to your needs, they can include scheduled audits, troubleshooting, and hands-on training.

This proactive approach reduces unplanned downtime, and our experienced Support Engineers are ready to help whenever issues arise.

Training Offering

In addition to our professional services, HMS Networks offers certified training in PROFIBUS, PROFINET, and EtherNet/IP to help your team confidently design, maintain, and troubleshoot industrial networks.

Hands-on courses ensure your workforce can prevent issues, improve network performance, and maintain long-term reliability.

Training brochure.

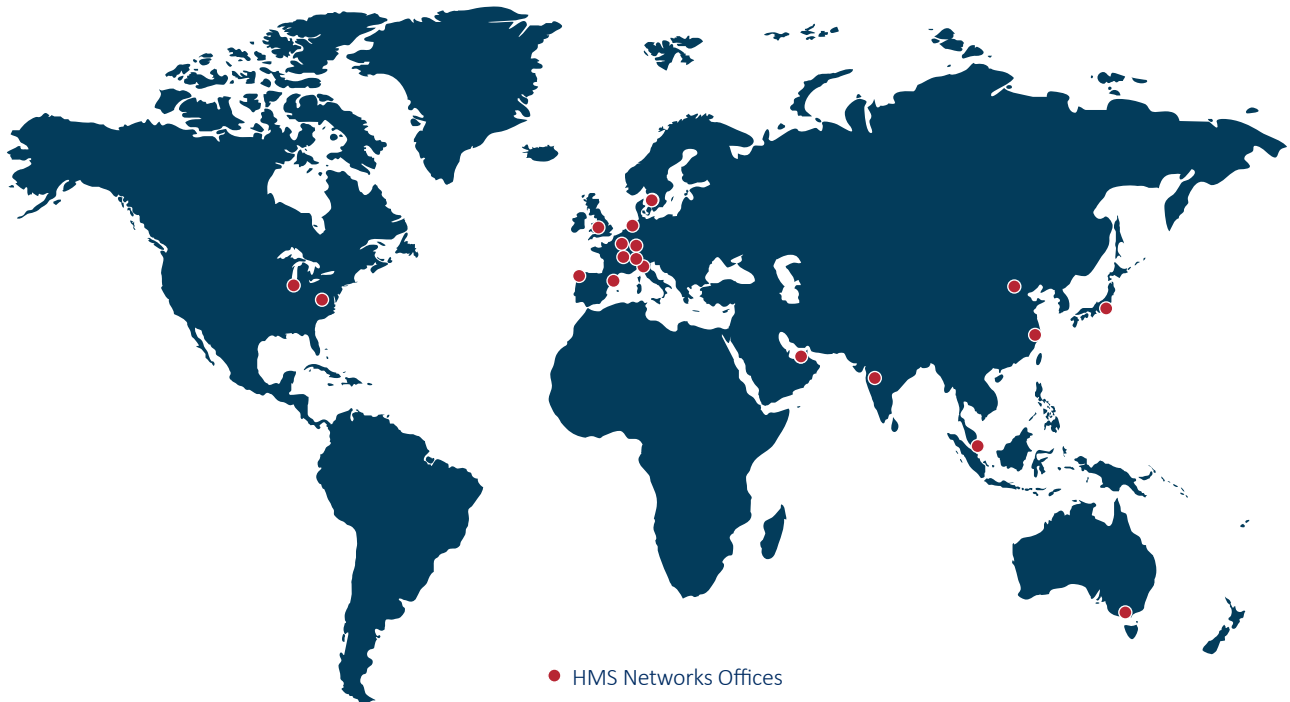

Connect and Stay Connected.

At HMS, we deliver end-to-end industrial connectivity solutions designed to keep your operations connected and reliable.

Our professional services complement these solutions with the expertise and certified skills required to maximize performance across industrial network environments.

Global Expertise. Local Support.

Wherever your operations are located, HMS-certified engineers deliver consistent, high-quality support and diagnostics.
