HMS Security Advisory Report

HMSSAR-2016-03-01-001

Publication date: 01 March 2016

Ewon Security Enhancement (FW 11.2s2)

Ewon reference: Webserver - Ewon authentication mechanism improvement

Affected devices: All
Affected firmware versions: All

Description:
A non-authenticated user could get access in read only to some Ewon device information.

Mitigation Factors:
As a rule, we recommend:

- to avoid making Ewons devices being directly reachable from non-trusted user by using a firewall and an access control policy.
- for remote access, use a secure remote access solution like Talk2M.

Solution:
Install the last firmware version. This has been fixed as from version 11.2s2.
